

# Turning software into hardware - Hastlayer

Zoltán Lehóczy @ Lombiq

ProgSCon London

22 April 2016

Lombiq

# HASTLAY R

*be the hardware*

software → hardware

logic expressed as software → logic expressed as hardware

computer program → computer chip

## ...with FPGAs

- Field-programmable gate array
- Can behave as any logic circuit (terms and conditions apply)

Image by SparkFun Electronics, Boulder, USA

computer program → FPGA logic

.NET (C#, F#, VB, C++, PHP, JavaScript, Python...) → FPGA logic

.NET → VHDL → FPGA logic

“It’s writing code so it must be like programming.”

~~“It’s writing code so it must be like programming.”~~

# But why?

- 10-100x faster
- 10-100x less power consumption
- Free\*

\*not actually free

Demo time!

Demo time!

# Beyond the infinite

- Open-source
- Hastlayer Cloud
- FPGAs in every datacenter (Xeon + FPGA)

# That's all folks
